

Townsville Regional Engineering Cluster (TREC)

One of our new members, TREC, has really grown over the last 5 months and now represents 63 regional members. With several new projects coming over the next few months, TREC is looking for new SME members in the construction, infrastructure, trades, engineering and services areas to complete its portfolio of members and enable the group to win more business for local companies.

Trec provides the following benefits to members:

- Access to Like minded Companies for Cluster Business Opportunities.
 - Able to bid for all or large part of projects as a group with the relationship with the customer handled and Project Managed through an independent Company member of TREC where required.
- Flow of information regarding market trends and Project Opportunities (Market Intelligence)
- Facilitates business growth through developing opportunities outside North Queensland.
- Network opportunities
- Training and development programs such as health and safety, business excellence, Quality assurance, Tendering training, Project management and Code Compliance.
- Development of workforce for the future through TREC and educational institutions working together.

There are exciting opportunities for the cluster coming up and the greater the number of members the greater opportunity to grow local business and win bigger projects.

Through BIO, TREC can transfer middle size and large projects to its members automatically improving member's ability to pick up project work.

Annual fees have been kept low to ensure TREC can grow and meet customer's needs. Annual rates are \$825 incl GST.

If you are interested at joining TREC please contact David Wylie at 0400093838 or trec@trec.net.au and David will visit your company and introduce the Cluster.
